JOÃO PESSOA, PARAÍBA, BRAZIL

SUMMARY

Full-Stack and Mobile Developer with a strong UI/UX foundation and 10 years delivering digital products end to end — from visual concept to production and operations — choosing the stack that fits each project.

I continuously research and experiment with new technologies to match them to day-to-day challenges, moving between web, mobile, automation and data as the context requires, so every solution stays sustainable and aligned with the client's real needs. My design background (Figma, Adobe Suite) keeps brand, interaction and accessibility in sync from day one, with a focus on engaging UX and striking visuals.

CORE SKILLS

- **Front-end:** React/Vite, TypeScript, Angular, Vue, Tailwind CSS, shadcn/ui, Redux Toolkit, Zustand, accessibility-first HTML/CSS
- **Back-end:** Node.js/Express (TS/JS), Python (Django), Go, PHP (Laravel), C#/.NET — REST APIs, webhooks, third-party integrations, observability
- **Mobile:** Flutter (Dart) — from prototype to store publication (Google Play Store Listing certified)
- **Data:** PostgreSQL, Oracle SQL, SQLite, MongoDB/Atlas, Firebase/Firestore, Redis
- **Automation & AI:** n8n, ETL pipelines, reporting automation, LLM / AI-agent workflows, Python/TypeScript/Go scripting
- **Design:** Figma, Adobe Illustrator, Photoshop, InDesign, After Effects — prototyping, design systems, branding, illustration, motion
- **Quality & DevOps:** Git (feature branches, conventional commits), Jest, Cypress, Pytest, GitHub Actions, Docker, Nginx, ESLint/Prettier

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & Designer

Self-employed

AUG 2016 – PRESENT · REMOTE

End-to-end web and mobile solutions for SMBs and creators via Upwork, Workana and referrals, defining the right stack for each product.

- **Web:** React/Vite, Angular or Vue front-ends with an accessibility-first approach (Tailwind + shadcn/ui, Redux Toolkit, Zustand); Node.js/Express, Python or Go back-ends — REST APIs, third-party integrations and observability.
- **Data:** PostgreSQL, SQLite, MongoDB/Atlas, Firebase/Firestore and Redis for caching.
- **Mobile & automation:** Flutter apps from prototype to production; n8n + Python/TypeScript/Go automations for SaaS/API integration, ETL, reporting and AI-enhanced workflows.

- **Design:** high/low-fidelity prototypes, design systems with dark/light themes, branding (logos, visual identity, social assets, ads, banners), illustration and motion graphics.
- **Quality:** automated testing (Jest, Cypress, Pytest), CI/CD with GitHub Actions, Docker and Nginx.

Senior Planning & Data Intelligence Analyst

AeC

APR 2026 – PRESENT · BRAZIL · REMOTE

- Design and ship automated reporting pipelines for contact-center operations — report layouts, calculation rules, data sources, schedules and distribution workflows.
- Build integrations between APIs, operational databases and reporting solutions; validate automated outputs against real-time operational data before production rollout.
- Act as technical liaison between Planning, Operations, Data Intelligence and Technology teams — documenting requirements, testing and homologating solutions.

Mid-Level IT Analyst

Dental Center

NOV 2025 – APR 2026 · JOÃO PESSOA, PB

- Architected and built a full IT asset management (ITAM) platform: React + TypeScript + Tailwind SPA with a Laravel (PHP) REST API managing assets, contracts and approval flows.
- Built a C#/.NET telemetry agent that collects PC hardware data and sends it over HTTP to a web-based approval queue for technician validation.
- Developed a Laravel webhook endpoint to integrate a Twilio-based billing reminder workflow, orchestrating notification triggers with the s4e API.
- Replaced a legacy PDF redirect with a dedicated on-site page for ANS/IDSS score results, improving user retention and UX.
- Led the CRM unification strategy: migrated the commercial team to Kommo CRM, decommissioning 2 redundant platforms and downgrading excess subscriptions.
- Handled daily on-site support tickets (hardware, software, access) alongside development work.

IT Analyst

Polybalas Distribuidora

NOV 2023 – NOV 2025 · JOÃO PESSOA, PB

- Built custom internal applications to optimize logistics and distribution processes (Winthor WMS & Fusion DMS environment), using Python, Dart, JavaScript and TypeScript with Django, React, Vue and Angular as scope required.
- Developed Python dashboards and automated data-extraction routines to monitor logistics KPIs; wrote and optimized Oracle SQL queries and data-integration workflows.
- Data modeling in PostgreSQL, MongoDB/Atlas and SQLite, plus strategic spreadsheets (Excel/Google Sheets) for distribution tracking and performance control.

EARLIER EXPERIENCE

- **Technology Researcher** — Ipec — Inteligência em Pesquisa e Consultoria · Mar 2023 – May 2023 · Curitiba, PR. Applied CGI.br's CETIC.br corporate IT survey mapping technology adoption across Brazilian companies; coordinated nationwide phone interviews and on-site visits to IT teams in Paraná.
- **Commercial Analyst** — UniCesumar · May 2022 – Oct 2022 · Curitiba, PR. Lead capture and conversion routines, local partnerships and brand events, reporting and follow-ups in CRM and Sheets.
- **Graphic Designer** — Secretaria de Estado da Segurança e da Defesa Social da Paraíba · Oct 2019 – Aug 2021 · João Pessoa, PB. Art direction for social media, digital illustration, mockups, video and editorial layout with Illustrator, InDesign, Photoshop and After Effects.

- **Officer Aspirant** — Brazilian Army · Feb 2017 – Dec 2017 · João Pessoa, PB. Completed the Reserve Officer Training Course (NPOR) — leadership, tactics, planning and administration; vice president of the class association.
- **Cashier** — BeMais Supermercados · Jan 2015 – Jan 2017 · João Pessoa, PB. Store-front operations from young apprentice to cashier; daily register closing with XML data extraction; basic IT support for the department.
